

EM-COOL^{HYBRID} CONTOURING

INTRODUCTION

EM-COOL Hybrid uses state-of-the-art freezing technology to remove excess subcutaneous fat from a specific part of the body by dissolving fat cells using cool temperature without damaging the surrounding tissue. Once cold, fat cells will decompose naturally and gently be eliminated through the body's normal metabolic processes. Designed with 360-degree surrounding cooling technology, the multiple cooling cups fit all curves and contours from as high as your chin all the way down to the knees to deliver absolute, non-invasive body contouring your way.

APPLICATOR INTRODUCTION

The Fourth-Generation applicators are upgraded with an exclusive patent, creating a core competitive advantage that is unique to **EM-Cool hybrid**.

FAST AND EASY APPLICATOR EXCHANGE

With a simple press-and-release mechanism, the EM-Cool Hybrid allows maximum convenience and makes switching cooling cups as simple as possible. Detaching cables or turning the system off is not required even during treatments.

The part description is for reference only, please select the corresponding handle according to the individual body for actual operation.
